TITLE : TELECONTROLLER DEVICE

ABSTRACT : PURPOSE: To provide a telecontroller device capable of executing effectively the control of a house appliance, etc., in a room especially at the time of going out by using a car.

CONSTITUTION: A number plate is read by a camera 14 set at the entrance of a parking area, and a registration number is recognized by a recognizing device 21. A room number is retrieved by accessing the registration number registered in a registering device 23 by a collating device 22, and the state of the house appliance of the room corresponding to this room number is monitor- displayed by a display 24. A driver operates a control setting device 25 on the basis of this monitor, and the house appliance is given an instruction corresponding to that set contents by a controller 26, and is controlled, and at the time of the going out or coming home by the car, the house appliance such as the lighting or the cooler, etc., of the room is controlled so that security in the room can be managed effectively.
